## When Moving Resins, Solvents, Paint & Coatings...

**It's Good To Know Blackmer's Got You Covered.**

Blackmer offers a comprehensive line of pumps designed to help Paint & Coatings producers:

- Improve fluid flow efficiencies
- Control costs through energy-efficient pump designs
- Eliminate VOC emissions and product leaks through seal integrity and sealless, zero shaft-leak pump designs
- Ensure uptime performance – with self-priming, high suction pumps for applications susceptible to solvent evaporation between batches and for resin transfer from transports or storage tanks even in cold weather
- Control quality by ensuring volumetric output consistency in mixing operations

Another reason why Paint & Coatings producers worldwide share a common demand...
