Blackmer® XL Series Sliding Vane Pumps Offer High-Level Performance In Lube-Plant Applications

Grand Rapids, MI – Blackmer®, the global leader in positive displacement pumps, announces its XL Series sliding vane pumps are ideal for process, filling and transfer applications in lube oil plants. Utilizing Blackmer's unique sliding vane design, XL pumps offer lube-plant operators the best-in-class combined characteristics of sustained high-level performance, energy efficiency, trouble-free operation and low maintenance cost.

XL pumps are constructed of ductile iron that will withstand sudden thermal shock and stress well beyond the capabilities of cast iron pumps. All models are fitted with replaceable casing liners and end discs that allow easy rebuilding of the pump without the need to remove the pump from the piping. The XL models are available in 1.25-, 1.5-, 2-, 3- and 4-inch port sizes with capacities from 5 to 345 gpm (19 to 1,305 lpm). The 1.25- and 1.5-inch models have NPT-tapped ports and are capable of running at motor speeds up to 1,750 rpm. The 2-, 3- and 4-inch models have flanged ports.

Standard elastomers include FKM O-rings with optional Buna-N or PTFE elastomers also available. A wide variety of mechanical seal components and vane materials are optional. Mounting options include base-mounting with helical gear reducers for all sizes or an integral bracket for direct mounting to a NEMA C-face motor for the XL1.25 and XL1.5 models.

For more information on Blackmer® XL Sliding Vane Pumps, please contact Tom Stone at stone@blackmer.com or (616) 248-9252, or visit www.blackmer.com. Blackmer is an operating company within Dover Corporation's Pump Solutions Group (PSG™). For more information on PSG, please go to www.pumpsq.com.

Blackmer® is the leading global provider of innovative and high-quality rotary vane pump and reciprocating compressor technologies for the transfer of liquids and gasses. For more than a century, the Blackmer name has stood for unparalleled product performance, superior services and support, well-timed innovation and a commitment to total customer satisfaction. Supported by a worldwide network of distributors and original equipment manufacturers, Blackmer pumps and compressors are used in a multitude of applications in the Process, Energy, Transport and Military-Marine markets. Blackmer - headquartered in Grand Rapids, Michigan, USA - is a member of Dover Corporation's Pump Solutions Group (PSG™).
